OBJECTIVE

Third-year B.Tech Computer Science student (AIML) (CGPA: 9.3/10) with a strong foundation in Machine Learning, AI systems, and Python. Focused on ML/AI development through hands-on projects, with growing interests in neuroscience, brain-computer interfaces, and entrepreneurial product development. Seeking ML/AI internship opportunities to apply technical skills to real-world AI systems.

EDUCATION

B.Tech – Computer Science & Engineering (AIML) | 2024 – 2028 (Expected)
Ramdeobaba University (RBU), Nagpur | CGPA: 9.3/10.0

LEADERSHIP & CULTURAL INVOLVEMENT

3D Artist – College Technical Club | 2024–Present

Created 3D models, animations, and event visuals using Blender; collaborated with technical and cultural teams on creative projects.

Member – Kaagaz Open Mic Community | 2024–Present

Contributed to event organization and community initiatives; helped organize open mic events and artistic showcases.

Hackathon Leadership

Co-led teams at **Smart India Hackathon (RBU Internal Round 2025)** and **SB Jain Inter-College Hackathon (2025)**; coordinated team activities, project development, and presentations.

PROJECTS

Face Recognition Attendance System

Built a computer-vision attendance system for face detection and recognition in individual and group images, with a deployed Streamlit interface.

<https://fr-attendance.streamlit.app/>

Technologies: Python, OpenCV, InsightFace, ONNX Runtime, Streamlit

EEG Headband Prototype – Entrepreneurship Project | 2026

Conceptually designed a dry-electrode EEG headband, covering electrode placement, signal-acquisition architecture, and wearable form factor; developed and presented its product concept and market positioning.

Technologies: EEG, Signal Acquisition, Product Design

FitSync – AI Health & Diet Companion | 2026–Present | *In Progress*

Building an AI-powered health application using nutrition, activity, sleep, and biometric data to generate personalized recommendations and explore anomaly detection.

Technologies: Python, FastAPI, Firebase, Machine Learning

Obstacle Detection & Avoidance Bot | 2025

Developed an autonomous Arduino-based robot using multi-sensor input and embedded C++ control logic for real-time obstacle detection and avoidance.

Technologies: Arduino, C++, Ultrasonic Sensors

QuizCraft – NLP-Based MCQ Generator | 2025

Developed an NLP-based application that extracts keywords from unstructured text and generates structured MCQ content.

<https://tiwaria00172.github.io/QUIZR/>

Technologies: JavaScript, NLP, HTML, CSS

EXTRACURRICULAR & PERSONAL DEVELOPMENT

- **Top 20% (75/374 valid submissions)** – Fugacity 2026 ML Hackathon, organized by ChEA, IIT Kharagpur.
- **200+ LeetCode problems solved** – Demonstrated strong foundation in Data Structures, Algorithms, and SQL.
- **9.3/10 CGPA** – Strong academic performance in Computer Science & AIML.
- **Smart India Hackathon 2025** – Shortlisted in RBU Internal Round; co-led a 4-member team on technical architecture.
- **SB Jain Inter-College Hackathon 2025** – Shortlisted in Round 1; led fintech project development.

RELEVANT SKILLS & ATTRIBUTES

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript

ML & Data: Machine Learning, Scikit-learn, NumPy, Pandas, Matplotlib

Computer Vision: OpenCV, InsightFace, ONNX Runtime

Backend & Tools: FastAPI, Firebase, Streamlit, Git, Jupyter, Google Colab

IoT: Arduino, ESP32, Embedded C++
